JOSH PEAKER

Freelance Senior Full Stack Engineer | London, UK | josh@joshpeaker.dev | 07708056249

Profile

Freelance Senior Full Stack Engineer with 12 years of experience architecting resilient enterprise backend services, scalable REST/GraphQL APIs, and high-performance web applications using C#/.NET, Node.js, and TypeScript. Specialized in end-to-end product delivery, from database design, API payload transformation, and cloud infrastructure (AWS and Azure) down to polished React and Next.js user interfaces. Proven track record across high-scale enterprise systems. Available for contract engagements for Q4.

Core Technical Competencies

- **Backend & Cloud Architecture:** C#, .NET Core, Node.js, TypeScript, NestJS/Express, REST & GraphQL APIs, Database Migrations & Data Modeling, Azure, AWS, Microservices.
- **Frontend & Frameworks:** Next.js, React, Vue, Complex State Management, Component Libraries, Performance Optimization.
- **Engineering Practices:** Full-Lifecycle Product Engineering, Monolith Migrations, Type Safety, Data Payload Transformation, CI/CD.

Professional Experience

monday.com, London, UK - **Senior Software Engineer** - September 2023 - June 2026

- Architected and built modular Node.js backend services to power reactive form creation and submission engines, enforcing strict type safety across multi-layered data models.
- Spearheaded frontend architectural migration in TypeScript, translating complex product requirements into modular, user-friendly form creation and submission interfaces.
- Engineered highly reactive, intuitive frontend submission experiences, balancing high design fidelity with strict type safety across complex form states.

Snyk, London, UK - **Senior Software Engineer** - July 2021 to July 2023

- Architected user-focused enterprise interfaces for reporting and compliance, turning complex batch data into clear, actionable dashboards using TypeScript and Vue.
- Built low-friction REST/GraphQL API workflows using Node.js, TypeScript, and Vue, turning complex vulnerability metrics into clear, actionable dashboards.

LoopUp, San Francisco & London, UK - **Senior Software Engineer** - Sept 2014 to July 2021

- Developed and maintained high-performance microservices and real-time communications platforms utilizing C# and .NET Core, spanning database migrations and backend integrations
- Architected scalable server-side systems and APIs, ensuring strict code quality, performance, and reliability through rigorous testing and enterprise design patterns.
- Optimized low-latency data rendering and asynchronous state synchronization to maintain smooth user experience during a 300% traffic surge.

Education

University of Oxford (University College) - BA Mathematics & Computer Science, 2011-2014
